

## Construction of Well 27-7 & Sun Village Pump Station Upgrades

This project will consist of construction and equipping of a new groundwater well in the unincorporated Los Angeles County community of Littlerock (Well No. 27-7). This project will also include abandoning an existing well (Well 27-4) and demolition of an existing pump station. The objective of this project is to improve the quality and the reliability of the Littlerock water supply system. The project is currently in construction, and is due to be completed by end of July 2009.
